ARE YOU COMPLIANT WITH ISO 6579-3?

Salmonella Big Five Kit

THE IMPORTANCE OF ISO 6579-3:2014

Salmonella (non-typhoidal) is 1 of 4 key global causes of diarrhoeal diseases and affects 550 million people every year, with over 33 million losing their lives*.

The ISO 6579-3:2014 standard was developed to inhibit the spread of *Salmonella* in the microbiology of the food chain and to support human, animal, and environmental health.
